

Editorial Error

In the article titled “Novel Pharmacomechanical Thrombolysis for Treating Intermediate-Risk Acute Pulmonary Embolism: The Bashir Endovascular Catheter,”¹ published online 15 December 2021, the *Texas Heart Institute Journal* editorial staff inadvertently changed *thrombotomy* to *thrombectomy*. The following sentence on page 2 of the PDF should read as follows: “The novel Bashir Endovascular Catheter (BEC) (Thrombolex, Inc.) enables both targeted thrombolytic delivery and mechanical *thrombotomy* to fragment thrombus and promptly restore alveolar blood flow in the presence of acute PE.”

Published: 8 February 2022
